About Me

23 year old full-stack web developer specialized in taking products from zero to production: architecture, SEO, and AI integration. Founder of kompara.es, a live platform generating real revenue with zero acquisition cost. Combines technical judgment with business vision, gained through direct client-facing experience. Looking to join a team where I can make an impact from day one.

Experience

Kompara.es — Own Startup
Full-stack Developer / Founder — Jan 2025 – Present

- Designed and built from scratch a home-services comparison platform with a proprietary CRM, reaching 10,000 monthly organic visits at zero infrastructure and acquisition cost.
- Migrated the frontend architecture from Next.js SSR to Static Site Generation, integrating structured data (Schema.org) and a URL architecture designed to scale through satellite sites without duplicating logic, alongside a semi-automated content generation system that runs with almost no human intervention.
- Built the backend on Supabase (PostgreSQL) and a proprietary CRM that unifies leads, content, and business logic, avoiding dependence on paid external tools.
- Deploy and manage in-house infrastructure on Oracle Cloud (VPS, Dokploy, Traefik, Cloudflare), keeping operating costs practically residual.
- Negotiated a commercial partnership to monetize generated leads, delegating sales closing to a team of closers in exchange for a commission per sale.

OVB Allfinanz — Spain
Financial Consultant — Dec 2025 – Jul 2026

- Advised individual clients on selecting financial products, managing the relationship from first contact through closing.
- Processed and coordinated contractual documentation for each transaction, ensuring compliance with legal and administrative requirements.

Girol Consulting — Asturias, Spain
Frontend Developer – Internship — Mar 2025 – Jun 2025

- Developed custom frontend interfaces for clients using HTML, CSS, JavaScript, Bootstrap, and WordPress.
- Implemented features and customized themes in WordPress in a production environment, reducing client delivery times.
- Created on-page SEO content.

Education

CIFP Avilés — Avilés, Asturias
Higher Vocational Training in Web Application Development (DAW) — 2023 – 2025

- Frontend (HTML, CSS, JavaScript, Bootstrap), backend (Java, PHP), and relational and non-relational databases (MySQL, MongoDB).
- Systems administration (Linux Server, Windows Server) and application deployment on Microsoft Azure.

IES Carreño Miranda — Avilés, Asturias
High School Diploma — 2021 – 2023
